

**ABSTRACT**

**SYSTEMS AND METHODS FOR ACCESSING AND DISTRIBUTING  
MEDICAL INFORMATION**

5

Systems and methods for gathering, utilizing, and/or distributing medical information. In some cases, the systems include a means for receiving medical information from a plurality of sources. Such sources can include, but are not limited to, a physician, a patient, and an implantable medical device. The systems further include a means for converting 10 medical information from an implantable medical device to a selected format, and a means for distributing the medical information to one or more databases.
